Contents Volume 119

1 A review of major paradigms and models for the design of civil engineering systems
L. Valadares Tavares

14 Schumann, a modeling framework for supply chain management under uncertainty
L.F. Escudero, E. Galindo, G. García, E. Gómez and V. Sabau

35 Approximate portfolio analysis
L. Liu

50 Decision-aid for discrete multiple criteria decision making problems with imprecise data
K. Miettinen and P. Salminen

61 Complex behaviour in a production–distribution model
E.R. Larsen, J.D.W. Morecroft and J.S. Thomsen

75 Fleet assignment and routing with schedule synchronization constraints
I. Ioachim, J. Desrosiers, F.V. Soumis and N. Bélanger

91 Focusing material requirements planning (MRP) towards performance
G. Plenert

100 Determining optimal pollution control policies: An application of bilevel programming
M.A. Amouzegar and K. Moshirvaziri

121 Collision computation of moving bodies
S.Z. Selim and H.A. Almohamad

130 Task oriented weighting in multi-criteria analysis
C.-H. Yeh, R.J. Willis, H. Deng and H. Pan

147 Extensions to the generalised assignment heuristic for vehicle routing
B.M. Baker and J. Sheasby

158 Undesirable facility location with minimal covering objectives
F. Plastria and E. Carrizosa

181 Optimisation of a single-component maintenance system: A smoothed perturbation analysis approach
B. Heidergott

191 Experimental evaluation of a graphical display system to visualizing multiple criteria solutions
R. Klimberg and R.M. Cohen

209 Performance of some boundary-seeking mode estimators on the dome bias model
M.D. Troutt, W.K. Pang and S.H. Hou

219 Book Review
H. Fleuren (ed.)

221 Editorial
L. Valadares Tavares

224 OR Utopia
R.E. Burkard

235 Interrelationships among the elements of national innovation systems: A statistical evaluation
W. Nasierowski and F.J. Arcelus

254 Measuring sectoral productivity across time and across countries
F.J. Arcelus and P. Arozena

267 Moments of support by a groupware brainstorming tool in handling complex technical policy problems
D.J. DeTombe
282 Local search for the Steiner tree problem in the Euclidean plane
M. Zachariasen
301 Generalized semi-infinite programming: Theory and methods
G. Still
314 Cluster based branching for the asymmetric traveling salesman problem
J. Lysgaard
326 Solving an assignment–selection problem with verbal information and using genetic algorithms
F. Herrera, E. López, C. Mendana and M.A. Rodríguez
338 Solution of a possibilistic multiobjective linear programming problem
M. Arenas Parra, A. Bilbao Terol and M.V. Rodríguez Ura
345 Global optimization methods for high-dimensional problems
F. Schoen
353 A generalization of Ruckle's results for an ambush game
N. Zoroa, P. Zoroa and M.J. Fernández-Sáez
365 The core of games on convex geometries
J.M. Bilbao, E. Lebrón and N. Jiménez
373 Consequences of dropping nonessential objectives for the application of MCDM methods
T. Gal and T. Hanne
379 Cognitive support methods for multi-criteria expert decision making
R. Bisdorff
388 Multicriteria procedural rationality on SISDEMA
J.M. Moreno-Jiménez, J. Aguarón-Joven, M.T. Escobar-Urmeneta and A. Turón-Lanuza
404 Multicriteria decision aid in financial management
C. Zopounidis
416 Analysing production and environmental risks in arable farming systems: A mathematical approach
A.J. de Buck, E.M.T. Hendrix and H.B. Schoorlemmer
427 A system for the design of short term harvesting strategy
R. Epstein, E. Nieto, A. Weintraub, P. Chevalier and J. Gabarró
440 A simulation analysis of sequencing rules in a flexible flowline
M.T. Costa and J.S. Ferreira
451 Multi-plant production planning in capacitated self-configuring two-stage serial systems
C. Vercellis
461 Scheduling of industrial distribution manifolds with pre-conditions
A.C.S. Amaro and A.P.F.D. Barbosa-Póvoa
479 The general behavior of pull production systems: The allocation problems
N. Kirkavak and C. Dinçer
495 Learning to improve reliability during system development
L. Walls and J. Quigley
510 The risk of delay of a project in terms of the morphology of its network
L. Valadares Tavares, J. Antunes Ferreira and J. Silva Coelho
538 The multi-mode resource-constrained project scheduling problem with generalized precedence relations
B. De Reyck and W. Herroelen

557 Constraint satisfaction problems: Algorithms and applications
S.C. Brailsford, C.N. Potts and B.M. Smith
582 Optimal production planning in pull flow lines with multiple products
J. Yang, H. Yan and S.P. Sethi
605 Nonparametric analysis of educational costs
J. Ruggiero
613 Designing multi-vehicle delivery tours in a grid-cell format
A.G.N. Novaes and O.D. Graciolli

635 Selecting the best choice in the full information group interview problem
Y.H. Chun
652 Characterizing an equitable allocation of shared costs: A DEA approach
W.D. Cook and M. Kress
662 An evolutionary heuristic for quadratic 0–1 programming
A. Lodi, K. Allemand and T.M. Liebling
671 An optimality cut for mixed integer linear programs
G. Laporte and F. Semet
678 On the balancedness of multiple machine sequencing games
H. Hamers, F. Klijn and J. Suijs
692 The development of modular-based design in considering technology complexity
Y.-T. Tsai and K.-S. Wang
704 A quality control approach to consistency paradoxes in AHP
S. Karapetrovic and E.S. Rosenbloom
719 A hybrid approach for optimization of one-dimensional cutting
M. Gradišar, G. Resinovič and M. Kljajić
729 Sequencing and scheduling *N* customers for a stochastic server
P.P. Wang
739 An optimal maintenance model for a combination of secondhand–new or outdated–updated system
L. Yeh
753 Contents Volume 119
756 Acknowledgement to Referees
761 Invited Reviews 1995–1999
763 Feature Issues 1990–1999
765 Keyword Index Volumes 112–119 (1999)
773 Author Index Volumes 112–119 (1999)
791 Book Review Index Volumes 112–119 (1999)
